Ghisa

Parola chiave: sorprendere. In una materia plasmata per durare, oltre i canoni della classica porcellana. Ghisa nasce per raccontare una cucina moderna, autentica, profonda, tra carattere ed estetica non convenzionale. Una finitura variegata e superfici intense, in porcellana feldspatica, dalla cucina alla tavola senza perdere identità.

Keyword: surprise. In a material shaped to last, beyond the standards of classic porcelain. Ghisa was born to represent a modern, authentic, profound cuisine, balancing personality and unconventional aesthetics. A varied finish and intense surfaces, in feldspathic porcelain, from the kitchen to the table without losing its identity.

Ghisa

Hai voglia di cambiare l'aspetto della tavola?

Vuoi qualcosa di nuovo, lineare e che esalti il tuo capolavoro culinario: articoli della linea Ghisa, sempre in porcellana feldspatica ma con una finitura variegata che garantisce pregio, resistenza e calore alla tua presentazione.

La finitura ghisa non è delicata come il nero lucido.

Do you want to change the appearance of the table?

You want something new, linear and that enhances your culinary masterpiece: items from the cast iron line always in feldspathic porcelain but with a variegated finish that guarantees value, resistance and warmth to your presentation.

The cast iron finish isn't as delicate as glossy black.

Progettate per l'utilizzo a piani induzione

Garantiscono una distribuzione del calore efficiente e uniforme, anche in contesti professionali intensivi. Prestazioni, affidabilità e praticità in una soluzione pensata per la cucina contemporanea.

Designed for use on induction hobs

They ensure efficient, even heat distribution, even in intensive professional environments. Performance, reliability, and practicality in a solution made for contemporary kitchens.

GASTRONORM

Induction

L'induzione crea un "campo magnetico" attraverso delle bobine alimentate dalla corrente elettrica, che genera calore direttamente sul fondo della gastronorm una volta che questa viene appoggiata al piano cottura. La tecnologia ad induzione offre il vantaggio che il calore sviluppato viene trasferito direttamente sul fondo della Gastronorm senza dispersione. Nella cottura tradizionale, invece, il calore scalda prima il piano cottura, che poi per trasmissione scalda la pentola, con notevoli sprechi e inefficienze.

Induction creates a "magnetic field" through coils powered by electric current, the coils generate heat directly on the bottom of the gastronorm once it is placed on the hob.

Induction technology offers the advantage that the heat developed is transferred directly to the bottom of the gastronorm without dispersion. In traditional cooking, instead, the heat heats before the stove, which then by heat transmission heats the pot, with considerable waste and efficiency.

Stoneware

Lo stoneware è costituito da un impasto molto resistente, composto da una miscela impermeabile con assorbimento d'acqua pari allo 0% ma differisce dalla porcellana per la sua composizione, non necessariamente costituita da pregiati materiali naturali, e poco meno vetrificato per le differenti temperature di cottura.

Il colore dell'impasto difficilmente è bianco causa le impurità presenti nell'argilla per la sua produzione.

Le caratteristiche tecniche di composizione, cottura e resistenza molto simili alla porcellana lo rendono adatto all'uso professionale.

Stoneware can be considered a resistant mixture with water absorption tending to 0%, but differs from porcelain because of its composition, not necessarily made with fine natural materials and a little less vitrified because of different firing temperatures.

The color of the mixture is hardly white, due to impurities in the clay used for its production, and is normally glazed.

However, due to its technical composition, cooking and resistance very similar to porcelain, turns out to be suitable for professional use.
